

OFFSET ACCESS CAGE (BIG RED)

A key requirement for any operational construction site is a facility that ensures the safe and efficient transfer of personnel and materials to and from areas that are otherwise difficult to access.

Offset Access Cage features an extension with sides rising above waist height, complete with a handrail for added safety. Harness points are strategically located between the cage and the extension, ensuring secure and stable transport.

The only product of its type in the UK & Europe

Product Features:

- Pockets located at the base of the unit for easy transportation using a forklift
- This product can be customised to meet your specific needs regarding size and lifting capacity
- Features additional lifting points on the side for easier installation of tie brackets to cores below the slipform
- The opening hatch at one end allows easy access for bolting brackets to cores, without the need to work outside
- Consisting of two additional rails at the bottom of the unit to tether tools at working height
- The unit has four bump stops at the end to prevent marking any walls while working
