

# ACCESS CAGE

The secure access cage can be used to transport personnel around site.

It has been specifically designed to reach confined spaces or to provide access to areas such as tunnels or shafts.

The cage offers good visibility and is equipped with internal harness attachment points.

## Key Benefits:

- Access cages are manufactured with half height steel sides for optimum safety, providing excellent visibility for personnel in the cage and machine operators
- A wide range of sizes are available
- Entrance doors feature a safety lock mechanism
- Access cages can be transported by crane or forklift using either a 4 legged chain or the fork pockets

## Specification:

Capacity (ltr)	SWL (kg)	Width (mm)	Length (mm)	Height (mm)
1 person	150	725	725	2185
2 person	250	1060	1200	2250
4 person	570	1625	2150	2185

*\*For additional sizes, please enquire with a member of the WOLFF Onsite team*

**Safety Tip:** Chains for access cages should not be used for any other application and should be secured directly to the cage, safety pin shackles.
