

SELF LEVELLING BRICK FORKS

Self levelling brick forks are designed to lift brick packs and pallets, by using the adjustable forks.

The compensation mechanism attached to the lifting eye ensures the forks remain level with or without a load.

This unit is also supplied with a safety net to comply with current regulations.

Key Benefits:

- The self levelling design works even when unloaded allowing for easy use and storage
- Adjustable height to suit different sized loads
- A durable and robust piece of machinery, built to withstand wear from use on construction sites

Specification:

SWL (kg)	Tine Length (mm)	Tine Cross Section (mm)	Height (mm)	Weight (kg)
2000	1000	40 x 120	1500	198
3000	1000	50 x 130	1700	364

Safety Tip: Loose or split packs should not be lifted. All packs should be shrink wrapped or strapped. Crane forks should not be used without a restraint net.
