SPECIFICATION SHEET

2086-BRIDGED FORK MOUNTED HOOK

The fork mounted load hook enables the conversion of any fork lift unit into a simple mobile crane unit allowing the lifting of items by chains and slings in a secure and safe manner.

The 2086 benefits from a bridged cross beam allowing the unit to lay flat and reducing damage and wear to the bearing swivel hook.

As with all Eichinger fork mounted units the 2086 is secured to the fork lift by a heel pin NOT chain.

All attachments should be used in conjunction with the forklift manufactures data / load plates.
