600kg Counterweight Balancer

# Counterweight Balancer 600 [600kg]

**The Counterweight Balancer 600 has been designed for lifting and installing materials underneath building soffits and overhangs.**

Perfect for both low level and high-level installation work, the Counterweight Balancer 600 features a lifting capacity of up to 600kg and can manoeuvre loads below overhangs up to a depth of 600mm.

The Counterweight Balancer 600 can be used alongside a below the hook vacuum lifter*, making it ideal for lifting glass, cladding and curtain walling materials (the weight of the vacuum lifter must be taken off the weight of the safe working load of the balancer).

### Reference Code
CWB600

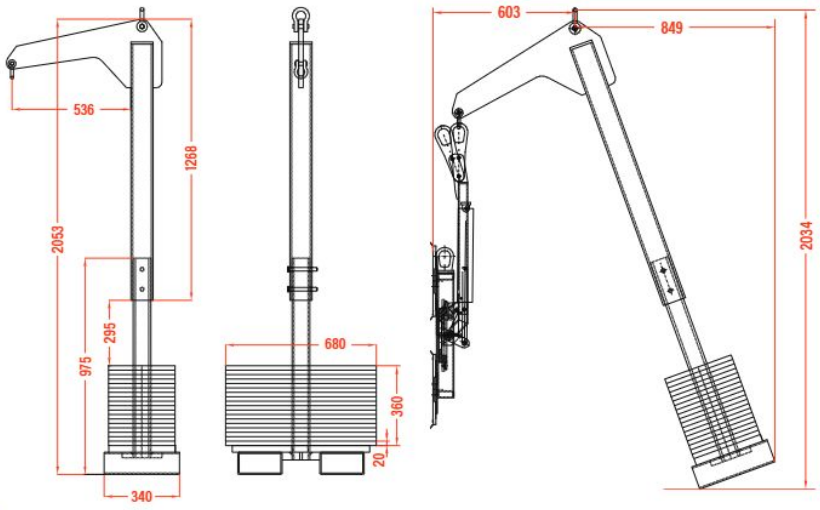

## Technical Specifications

| | | |
|---|---|---|
| **Safe working load** | capacity: | 600kg |
| **Weight of lifter** | weight: | 636kg (with counterweights) |
| **Depth of overhang** | depth: | 600mm |
| **Balance control** | control: | counterweight saddle |

The Counterweight Balancer 600 features forklift points to help with transportation

## Technical Data (mm)

*use of below-the-hook vacuum lifters depend on type of project. Below the hook lifter not included.*
