ML 3.0 FX - Crane Kit

The 3.0 FX Crane Kit is a cutting-edge accessory designed to elevate the versatility of the ML 3.0 FX tracked carrier.

Developed for professionals who demand power, precision, and adaptability in compact spaces, this modular crane attachment instantly converts your tracked transporter into a fully functional lifting system — without the need for a dedicated crane.

Weighing a total of 510kg, this strong unit can safely handle loads such as steel girders, timber beams, concrete posts and much more. Built with the same innovation and rugged design the ML range is known for, the 3.0 FX Crane Kit delivers a maximum lifting capacity of up to 990kg, making it ideal for a wide variety of medium-duty lifting tasks.

Thanks to its compact structure and lightweight build, it offers exceptional stability and low ground pressure, allowing for safe operation on soft or sensitive terrain where wheeled cranes can't perform.

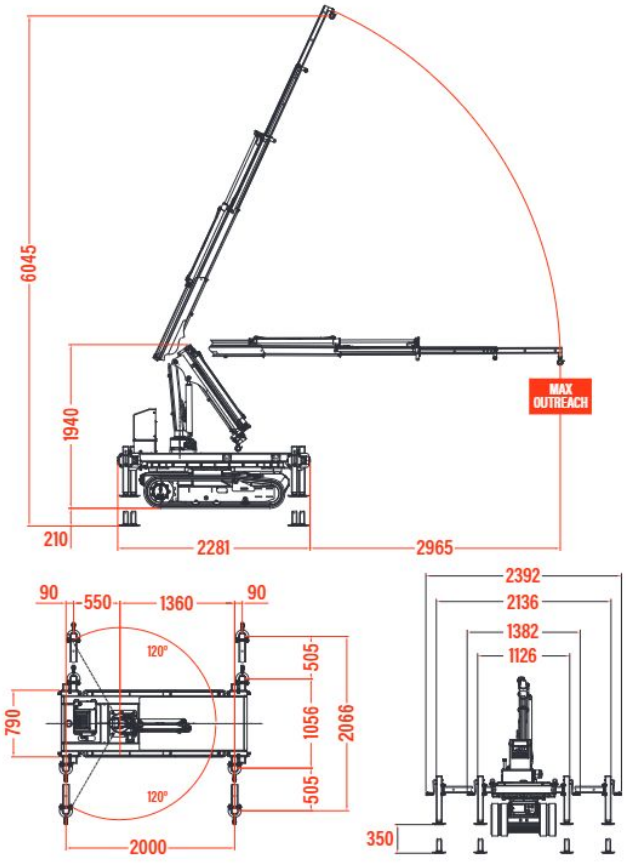

Whether you're working in construction, glazing, logistics, or maintenance, the 3.0 FX Crane Kit empowers you to lift, position, and handle materials with confidence, even in the most confined or uneven environments.
