DRUM GRABS

Hydraulic Forklift Drum Grab

The hydraulic forklift drum grab is built for high-volume drum handling. It clamps a 210 litre steel or plastic drum between polyurethane-coated jaws, powered from the truck's auxiliary hydraulics, so the driver grips and releases every drum from the cab.

- ✓ Hydraulic clamping from the cab
- ✓ Handles steel and plastic 210 litre drums
- ✓ Non-marking 60A polyurethane jaws

PART NO. WOS-FA-1037

KEY FEATURES

- Double-ended, dual-acting cylinder for even jaw movement
- Adjustable clamping pressure
- Ample fork pockets, heavy duty construction
- Painted or galvanised

SPECIFICATIONS

Part no.	Finish
WOS-FA-1037-01	Painted
WOS-FA-1037-02	Galvanised
