HGC Hand grip clamps

Working load limit (WLL) 250 kg

The HGC hand grip clamps are suited for the individual transportation of light and thin materials. They have a jaw capacity of up to 10mm, and can lift up to 250kgs.

To operate the clamp you simply press down on the hand grip which compresses a spring. This allows the clamp jaw to open and you simply slide the clamp on to the material to be lifted.

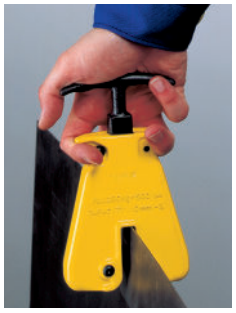

Product group: I2

INFO

Available with 300 mm extended handle.

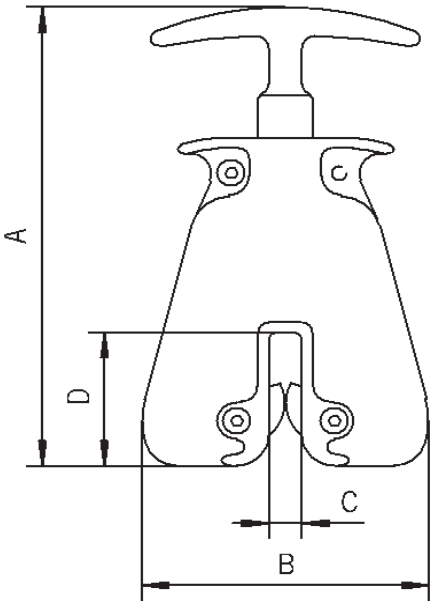

The HGC can also be supplied with an eyebolt instead of the handle.
