Stainless Steel AISI 316 Products

Full details and safety information about our range of Stainless Steel AISI 316 Products.

APPLICATIONS

Especially in circumstances where corrosion can cause problems, the use of stainless steel products is recommended.

RANGE

George Taylor offers a wide range of stainless steel items like shackles, thimbles, wire rope grips, eye bolts, rigging screws etc.
Upon special request other stainless steel items can be manufactured.

DESIGN

Items supplied by George Taylor are all manufactured from stainless steel quality AISI 316.
All stainless steel items have an equivalent in a regular steel quality, we refer to the specific chapters for further design details.

FINISH

All stainless steel items are polished.

INSTRUCTIONS FOR USE

We refer to the relevant product chapters in this catalogue for details on use of a specific item.
In general, items should be inspected before use to ensure that:

- All markings are legible;
- The item is free from nicks, gouges and cracks;
- Never repair or reshape an item by welding, heating or bending as this may affect the strength.

It is required that the products are regularly inspected and that the inspection should take place in accordance with the safety standards given in the country of use. This is required because the products in use may be affected by wear, misuse, overloading etc. with a consequence of deformation and alteration of the material structure.
Inspection should take place at least every six months and even more frequently when the products are used in severe operating conditions
