LIGHT CRANE SYSTEMS
LIGHT CRANES

RED ROOSTER LIFTING

RAISING EXPECTATIONS

KITO ERIKKILA LIGHT CRANES are a user-friendly personal workstation crane with extensive work area coverage.

Single and double girder cranes are user-friendly personal workstation cranes with extensive work area coverage. The swinging of the load is minimised due to the smooth-running push trolley centralising the load automatically to the correct lifting position. The cranes are easy to operate, enabling a smooth transfer of loads and boosting productivity when used.

The cranes can either be mounted to the ceiling or bolted to the floor with a freestanding support frame.

Operating the light crane system requires minimal effort from the user, making it safe and ergonomic. The crane profiles are manufactured with a world-class weight–load carrying capacity ratio. Light crane solutions are modular and assembled from various standard components, and the complete solution can be configured to meet the diverse lifting requirements in multiple industries.

A perfectly optimised solution can be found by combining steel and aluminium profiles.

LIGHT CRANES
SINGLE GIRDER

RED ROOSTER LIFTING

RAISING EXPECTATIONS

SINGLE GIRDER
STEEL BRIDGE & TRACK*

Capacity	50 – 1500 kg
Span	2 – 8 m
Track	4 – 50 m
Hoisting	5 m

SINGLE GIRDER
ALUMINIUM BRIDGE & TRACK*

Capacity	50 – 1000 kg
Span	2 – 7,8 m
Track	4 – 30 m
Hoisting	5 m

The maximum load capacity of a single girder crane is 1500 kg. An optimised solution can be found for any lifting requirements by combining steel and aluminium profiles. Single girder cranes can be manually operated or equipped with powered movements for trolley and bridge and normally they have an electric chain hoist to lift the load.

*Standard range - other options available as tailored solutions
