

LX-6

LX
'Budget' nylon wheeled skates

Capacity 6 t and 12 t

The LX range of load moving systems are available as a 'low cost' alternative to our premium Steerman range of skates.

These three point loading systems comprise of a steerable front and a pair of adjustable rear skates that are supplied complete and ready to use.

The steerable front skates (LX-6F and LX-12F) are supplied complete with a steering handle/towing bar, and the rear skates (LX-6/12R) are supplied complete with two adjustable alignment bars.

Features

- The wheels are made of hardwearing nylon.
- The front and rear skates can accept each 50 % of the total capacity.
- The front and rear skates are available individually.
