Stainless Steel Cupboards

Cupboard Construction

General Construction:

- 0.7mm stainless steel, pop riveted carcass construction.
- The door aperture has return bends to eliminate open gaps.
- Delivered as a fully assembled unit.
- Rust-resisting stainless steel shelves - weight load of 50 KG udl.
- Fitted with "no snag" 2-point locking mechanism.
- Floor chests have a riveted structure with an angled lid, supplied with a hasp and staple lock.

Cupboard Door Construction:

- Material: 0.7mm stainless steel.
- A stiffener is spot welded vertically in the centre of the door with two 2.½" stainless steel butt hinges spot welded to the door. The door is attached to the carcase via the hinges, with 4.8mm pop rivets. The door has two-point locking with an all-metal key-locking handle.
