Scaffolding Runway Support Bracket 27.B81

Part no. WOS-27.B81

The support bracket hangs the 27.000 track profile from the scaffolding structure using a standard scaffold connection on the bracket.

This scaffolding runway system is a light crane track that clamps straight onto scaffold tubes, so a hoist can lift and move materials onto and around a scaffolded structure. It is modular and bolted together, light enough to carry and fit by hand, and is far cheaper than bringing in a mobile or tower crane for the same job.

A run is built from track sections, splice joints where sections meet, support brackets between them, a track end stop with safety bolt at each end, and a load trolley for the hoist. At 1,000 kg SWL the track needs supporting at 1.5 m centres. The scaffold itself must be designed to carry the runway and its loads.

Specifications

Model	27.B81
Suits profile	27.000
Support centres for 1,000 kg	1.5 m
Finish	Zinc plated
Warranty	12 months manufacturer's warranty
