4-Wheel Runway Trolley 27.T48 – 1,000 kg

Part no. WOS-27.T48C

Four-wheel load trolley for the 27.000 track, to suspend a hoist from the runway. The trolley runs very freely, which takes the effort out of moving a suspended load along the track. Supplied with pin, without buffer.

This scaffolding runway system is a light crane track that clamps straight onto scaffold tubes, so a hoist can lift and move materials onto and around a scaffolded structure. It is modular and bolted together, light enough to carry and fit by hand, and is far cheaper than bringing in a mobile or tower crane for the same job.

A run is built from track sections, splice joints where sections meet, support brackets between them, a track end stop with safety bolt at each end, and a load trolley for the hoist. At 1,000 kg SWL the track needs supporting at 1.5 m centres. The scaffold itself must be designed to carry the runway and its loads.

Specifications

Model	27.T48 (with pin, no buffer)
Suits profile	27.000
SWL	1,000 kg at 1.5 m support centres
Wheels	4
Finish	Zinc plated
Warranty	12 months manufacturer's warranty
