Runway Track End Stop 27.X01

Part no. WOS-27.X01

End stop for 27.000 track. Fit one at each end of the runway so the trolley cannot run off the track, secured with the 27.X05 safety bolt.

This scaffolding runway system is a light crane track that clamps straight onto scaffold tubes, so a hoist can lift and move materials onto and around a scaffolded structure. It is modular and bolted together, light enough to carry and fit by hand, and is far cheaper than bringing in a mobile or tower crane for the same job.

A run is built from track sections, splice joints where sections meet, support brackets between them, a track end stop with safety bolt at each end, and a load trolley for the hoist. At 1,000 kg SWL the track needs supporting at 1.5 m centres. The scaffold itself must be designed to carry the runway and its loads.

Specifications

Model	27.X01
Suits profile	27.000
Finish	Zinc plated
Warranty	12 months manufacturer's warranty
