# Safety Bolt for Track End Stop 27.X05

Part no. WOS-27.X05

Safety bolt for the 27.X01 track end stop. Order one for every end stop.

This scaffolding runway system is a light crane track that clamps straight onto scaffold tubes, so a hoist can lift and move materials onto and around a scaffolded structure. It is modular and bolted together, light enough to carry and fit by hand, and is far cheaper than bringing in a mobile or tower crane for the same job.

A run is built from track sections, splice joints where sections meet, support brackets between them, a track end stop with safety bolt at each end, and a load trolley for the hoist. At 1,000 kg SWL the track needs supporting at 1.5 m centres. The scaffold itself must be designed to carry the runway and its loads.

## Specifications

| | |
|---|---|
| **Model** | 27.X05 |
| **Used with** | 27.X01 track end stop |
| **Finish** | Zinc plated |
| **Warranty** | 12 months manufacturer's warranty |
