Jib Crane Electric Kit – 500 kg Freestanding Jib, 3 m Arm

Part no. WOS-J-ELEC-26

Electric kit for the 26.000 profile jib arm, sized for the 3 m arm on the 500 kg freestanding jib crane. Fit it when you are running an electric chain hoist on the jib, so the hoist supply is carried along the arm rather than left hanging loose.

Pair it with the column mounted isolator kit so the hoist can be switched off and locked out at the crane. See our electric chain hoists for a hoist to suit.

Specifications

Model	J-ELEC-26-3M
Suits jib arm profile	26.000
Suits arm radius	Up to 3 m
Suits jib crane SWL	500 kg
